HISTORY

Imperial is a family owned business started in 1955 to serve the leisure home market. Since then, we have grown into the largest billiard and game room distributor in the US. But Imperial is more than just a distributor. With our own line of pool tables, cues and pool table accessories, Imperial is a long-trusted name in billiards. As experts of the industry, we design, develop and deploy exceptional products that customers are proud to display on their floor or in their home.

Stylish, fun and versatile, our products are crafted from top grades of lumber found in trees throughout North America including the Maple, Ash and Douglas Fir. Most of our pool tables are carved from solid wood and are guaranteed for life.

Each table can be customized to suit individual taste and preference without sacrificing the cuts needed to play an excellent game. Choose from a variety of cloth colors to match the décor of your home. Dining tops are standard and available with many models for your entertainment pleasure. We take pride in offering sturdy and beautiful sporting equipment that is functional, fun and designed for the perfect game.

- ✓ Complete delivery management
- ✓ Optimized lead times
- ✓ Reduced damage claims
- ✓ Regular carrier analysis
- ✓ Per-order carrier assessment
- ✓ Per-order shipping mode assessment

IMPERIAL FINISH GUIDE

- 1) Antique Walnut** - Traditional but beautiful, this popular stain is chocolate brown with a slight red undertone.
- 2) Mahogany** - A stain often used in traditional fine furniture. This stain has a reddish-brown to deep red coloring.
- 3) Espresso** - Dark brown almost black, this rich finish has no visible grain. It lends a sense of elegance to any space.
- 4) Black** - Black is the new black. It works in any room. The color of ink, this finish has no visible grain and is smooth to the touch.
- 5) Cappuccino** - Formerly known as our Charcoal finish, this is a light brown stain that reveals a stunning dark brown grain.
- 6) Silver Mist** - A popular stain in modern design. This stain is a light gray with dark gray textured grain.
- 7) Raven** - A dark gray brown with black grain, this finish is one of a kind.
- 8) Weathered Dark Chestnut** - This stain is dark brown to black with black graining and is popular in modern decor.

THE PENELOPE II

The next generation of a top selling table! The table features a thinner overall body and a new beveled exterior edge on the table and dining top instead of the straight edge from the original design. It comes with a dining top and is available in 3 finishes; Espresso, Cappuccino and Silver Mist. What's more, the Penelope II in Silver Mist has an exclusive design which combines the sleek, clean lines of the first generation table with the raw look of our more rustic tables. Not only will the table have that signature unpolished rough finish, but the accompanying dining top will have the planked look of the Reno, Barnstable and Bedford.

THE RASSON OX

The OX is equipped with Rasson designed and patented Slate Leveling and Leg Leveling Systems as well as TPR material pockets. Rasson's 30mm thick premium slate, K55 rubber cushion and aluminum beam guarantee the most consistent response and longevity of table use. The luxurious looking rail is warp, scratch and cigarette burn resistant.

The OX table meets and exceeds the specifications as set by both the EPBF and WPA.

NEW TABLES

GARLANDO G-500 WEATHERPROOF

The new Deep Blue and White G-500 weatherproof features silver details and legs and includes levelers, for a perfectly flat playfield on any ground. For outdoor playing it is manufactured using special weather resistant materials and components and, in addition, comes with a protection cover to shield the table colors from the sun fading effects. Suitable for indoor use too, it can be used at home in autumn and winter, making it an all-season table. Also available in a version with telescopic rods, specifically designed for child safety.

GARLANDO EXCLUSIVE

The Garlando Exclusive foosball table celebrates Garlando's 60th anniversary and is built for connoisseurs who have a taste for style. Its sleek but sturdy cabinet features an elegant wenge coating and is enhanced by brushed aluminum and wooden finishings. The table also sports a complete absence of visible screws and plastic details, creating a smooth, refined appearance.

GARLANDO PURE WHITE

Sturdy construction, excellent stability and outstanding playability characterize this foosball table boasting a stylish design with total white ultramodern effect. The table shares the same silver legs as the Evolution line but its handles differ with their silver plastic and inserts in wenge wood. The white and gray players on the white playfield with gray lines enhance the general impression of elegance. When equipped with telescopic safety bars the table ensures the highest level of safety.

GARLANDO IMAGE

The Garlando Image foosball table is a mirror-like foosball table with a heavy duty MDF cabinet and melamine coating. Below a sophisticated surface, this table features a sturdy construction using wood and metal and HDP (High Density Polymer) legs strengthened with fiberglass. Furnish your living room or your game room with a table that blends perfectly with surrounding decor. The Image table can be equipped with standard or telescopic steel rods.

30 mm Pro Slate - 9ft. table is comprised of precision cut 30mm (1.18") thick 3pc premium RASSON slate.

Slate Leveling System - Patent pending "LevelBox" allows for micro adjustments across 22 key locations for precise installation.

Rail - Unique processing compresses phenolic resin into hardwood veneers, for an ultra-durable finish.

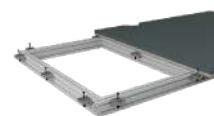

Leg Leveling System - Level the frame by rotating the screw in the pedestal to adjust the distance between the pedestal and the leg.

Cushion - KLEMATCH billiard cushions, made in France, offer a precise and exceptional bounce that is highly appreciated by demanding players.

Pockets - Made from Thermo Plastic Elastomers to eliminate scuffing, reduce ball rejection and dampen impact noise with patent pending T-shape slot device.

Aluminum Alloy Support Beam - Superior stability and precision with a climate consistent foundation.

Cloth - Default color is Simonis 860 Tournament Blue. Other colors may be available upon request.

BILLIARD ACCESSORIES

IMPERIAL DINING TOPS

Imperial has dedicated itself to bringing beautiful and modern designs to the game of billiards. We believe the game of billiards can bring families and friends together in main living spaces. That is why we have developed a line of multi-functional tables which, with the addition of one of our dining tops, can also be used as a dining table.

aramith®

ARAMITH BALLS

Saluc S.A., Belgium is the world’s largest manufacturer of pool, snooker and carom balls exported worldwide under the “Aramith” brand name. These quality billiard balls are produced from genuine case phenolic resins. A precise blend of resins guarantees exacting standards of diameter, weight and balance. The balls are baked several times in ultra-modern ovens, precisely ground, engraved and polished on completely computerized equipment.

The phenolic material brings vibrant colors and stability that results in a surface that is optimally resistant to any friction between ball and cloth.

80% of all players choose Belgian Aramith balls.

1

Heavy-duty design

Only the 100% pure Aramith® resin with its high-tech cross-linked molecular structure allows 5T load without break, for extended durability.

2

Optimal rebound

The unique resilience of Aramith® resin is calibrated for optimal and consistent rebound allowing perfect control on every shot.

3

The ultimate in balance

The specific Aramith® resin is the only one guaranteeing a perfect homogeneity resulting in perfectly true and accurate roll.

4

Exceptional longevity

Aramith® balls are a money-saving investment. Last up to 5 times longer and will lengthen dramatically your cloth life to assure the lowest yearly maintenance cost.

5

Burn spot resistant

Thanks to its unique 100% phenolic molecular structure • no flat spots on the balls, no white marks and burn spots on the cloth • keeps its smooth polish minimising table cloth wear

6

High impact resistance

• Withstands to over 50 times more impacts and is twice more scratch-resistant than other balls. • Its heavy-duty design includes a solid core running through the ball rather than number plugs.

7

Worldwide endorsement

All major federations worldwide and professional players accept only Aramith® for use in their championships.

8

We care about the environment

Made in Belgium, the whole process is engineered to exceed the environmental European legislation, the most severe in the world.

HIGH-PERFORMANCE CUES AND SHAFTS

For more than 30 years, Cuetec has been an industry leader in producing high-performance cues and shafts. Starting with the world's first fiberglass clad kiln dried maple cues, today Cuetec offers the widest range of meticulously crafted composite cues on the market. Utilizing advanced technologies and materials, Cuetec cues and shafts are built to give players the edge they need to compete at the highest levels.

Designed and developed in conjunction with Cuetec's Pro team, including five-time U.S. Open Champions Shane Van Boening, playability and performance are the driving factors behind every Cuetec product. From their limited lifetime warranties to the world first three-piece all carbon fiber jump cue, innovation and quality continue to drive the Cuetec vision.

THE CUETEC FAMILY OF PRODUCTS

Professional Series

Top-level equipment for the most demanding players and professionals. Includes all Cynergy Carbon Fiber Composite playing shafts, playing cues, Cynergy Breach break cue, and Cynergy Propel Jump Cue.

Avid Series

Durable high-performance cues for players and enthusiasts of every level. Includes the Denali, Gentek, Starlight, Natural, Prestige, Warrior, Platinum, Sneaky Pete, and Utility lines of cues.

Club Series

World-class single-piece house cues engineered for durability and performance in both home and club room environments.

CYNERGY

PERFORMANCE YOU CAN FEEL.

The relationship between a player and their cue is formed by feedback. It's comprised of thousands of tiny details, each interpreted by the player's senses: the sound of the hit, the depth and sightline with each practice stroke, the diameter and smoothness of the bridge as the shaft slides through, the slight vibrations felt in the player's grip as the cue's tip makes impact. Each of these interactions forges this relationship, creating trust between the player and their cue. It was with these factors in mind that Cuetec set-out to develop the highly acclaimed Cynergy line of high-performance carbon fiber composite playing shafts, break cues, and jump cues.

CYNERGY 15K PLAYING SHAFTS

FEATURES

Multi-directional Carbon Fiber Filaments

Cuetec's Cynergy carbon composite shafts are constructed with multi-pplies of resin-impregnated military grade unidirectional carbon fiber filaments. The orientation of these carbon fiber filaments is crucial to achieving optimal durability, strength, and performance. The result is a perfectly straight and ultra-strong shaft.

Flyweight Front-End Construction

Less weight means less deflection. Benefiting from their ultra-strong carbon composite construction, each Cynergy shaft features Cuetec's flyweight front-end build. This construction allows the Cynergy poly-foam to stop five inches below the tip, creating a low-mass rigid cavity.

SST (Super Slim Taper)

Developed to provide the most comfortable playing experience, each Cuetec Cynergy shaft features the all-new Super Slim Taper. Measuring 15.5 inches in length from the tip, each Cynergy shaft has virtually zero rise, allowing for a more level and precise stroke.

TABLE & GAME PARTS

IMPERIAL POCKET SHIELD

Add an elegant touch to your billiard table with a set of Shield Leather Drop Pockets. The pockets start with a solid cast iron core. The iron is then precisely computer drilled and threaded. Tanned leather is then formed and hand sewn to the iron core. The beautiful finish on the natural leather is the result of hand polishing by skilled craftsmen.
